SUMMARY

Software developer with expertise in the design and production of front-end web applications with full-stack experience. Proven ability to leverage experience to build interactive/user-centered applications. Demonstrated skill in improving software performance & implementing new functionalities.

SKILLS

Languages & Frameworks: JavaScript | SQL | Ruby on Rails | Mocha | TailwindCSS | Bootstrap

Libraries: React | Redux | Chai

DBMS: PostgreSQL | SQLite | Toad Data Point

Source Control, CI/CD: GitHub | Postman | Docker

Data Markup/Extensions: HTML | CSS

Other: Heroku | Netlify | Babel | AS400 | Salesforce | Microsoft Excel | SAP | Oracle

TECHNICAL PROJECTS

Persephone Grae's Cafe & Juice Bar - [Github](#) | [Demo](#)

Professional freelance restaurant website utilizing React-Router & styled-components

- Database managed via Express; reusable function components makes updates simple
- Built with thoughtful UI/UX, including conditionally-rendered navbar & custom hover animations

Mountain Buddy - [Github](#) | [Demo](#)

Sell/swap used equipment & search trails which displays extensive route information/weather forecasts

- Implements Google auth, Google Maps & external weather API
- Search/filter feature integrated with React hooks; dark mode capability
- Full CRUD to update user profile; conditionals allow access to app only if you're logged in

SkiBum - [Github](#) | [Demo](#)

Browse ski resort information & weather conditions as well as post to a blog forum

- Utilizes a weather API to include up-to-date weather information of resort cities
- Blog forum input is stored/persisted in a RESTful API

Brewery Discovery - [Github](#) | [Demo](#)

Find breweries nearby & view what's currently on tap; add beers you'd like to try to your "mini-fridge"

- Search/filter using React hooks; dark mode capability
- Utilizes localStorage to store encrypted user info client-side
- Integrated authentication/authorization with a Ruby on Rails backend

EXPERIENCE

McKesson

Las Colinas, TX

Contracts Analyst - Medical/Surgical Department

10/2017 - 10/2021

- Subject matter expert in two system migration projects, a \$2+ billion endeavor, including execution of cost compare reports, provided analysis & project management/communications
- Executed Salesforce cases covering an array of requests across all suppliers in our portfolio
- Mitigated system error through observance of common, error-prone system automations that resulted in minimized runtime for several RPA's
- Minimized runtime error for several RPA's through mitigation of system error
- Performed SOX compliance audits of particular vendor accounts on our legacy IBM platform

EDUCATION

Flatiron School

Full-Stack Software Engineering Program

Online (Live)

11/2021 - 04/2022

Texas Christian University

B.S. Economics, Finance emphasis

Fort Worth, TX

12/2016
